It is easy to show that an advertisement in this paper will cost much less per line than in any other paper published in this section. It is also the only paper in this section that publishes advertisements at a fixed price. It is also the only paper in this section that publishes advertisements at a fixed price.

We have been repeatedly annoyed by having business notices and purely advertising notices sent to us which the sender asks to be published free. They sometimes send in an advertisement worth several dollars accompanied with this cheering remark: "Put a subscriber for your paper and if you don't publish this reading notice advertisement I will stop it."

Our correspondents are also important to write these notices and nearly every week we cut out a column more or less of these advertisements that our correspondents have been asked to write and in some cases get into the paper for nothing.

This is not pleasant for our correspondents, it is not pleasant for us, and it cannot be pleasant for the ones who try to advertise in this paper.

Again it would be unfair and unjust to the ones who pay for their advertising if we allow other advertisers to write for nothing the same things that they pay for. That there may be no further misunderstanding we will here state that we are always glad and willing, and want to publish all advertisements that are business advertisements on ten cents a line, even words of the length one would usually write a column.

This is the price for those who do not have a contract for advertising in our columns, and all those who have contracts at the price for reading notices is plainly stated so here we have no trouble.

We do not do the work for our correspondents and other things of a public nature, we have no reason to do it. As to the price for the reading notices, we will gladly publish them for you and to give you your money's worth, if they are not of any value don't spend your time trying to get them for nothing.

Above all do not let our correspondents in having them write these notices unless you are willing to pay for them. In this case we will not write a line for you, but the correspondents 10 cents for each line, and you will see the reading notices in the town where you order it.

If the advertisement is of a nature that is in need of publication, we will be glad to publish it for you. Our subscription list is just as separate from our advertising columns as our job work is from our subscription list.
